Revolutionizing Accounting for Decision Making Francis X. Ryan CPA CGMA MBA 2016-05-13 This book combines multiple disciplines of lean and activity-based costing in a practical, easy-to-use way so that leaders can make informed decisions. Most of my life has been dealing with organizations that are in financial distress. Many financial decisions were based upon information that was technically accurate but simultaneously misleading or deceptive. Unfortunately, organizations are making decisions about selling divisions, shutting down product lines, moving facilities, and disrupting peoples lives without a clear understanding of the accuracy and the importance of those decisions. Individuals and their families have seen lives shattered because of suspect information. As a certified public accountant (CPA), we pride ourselves that our responsibility is to the public. We clearly state in our code of ethics that we have a responsibility to the collective well-being of the people that we serve. That is a daunting responsibility. We also have a responsibility to be objective. Objectivity requires us to be impartial, intellectually honest, and free of conflicts of interest and material bias. The principles of lean, activity-based costing, marketing, strategic planning, and traditional financial reporting are combined using existing systems so that decision-makers can be armed with accurate financial information. Activity-based costing is a process-oriented, systematic approach to attribute cost to the activities for which an organization is engaged to accomplish it strategic mission. An understanding of the organizations mission is essential for an accurate understanding of the nature of costs. The entire concept of activity based costing and going lean is designed to support the governance responsibilities of management. Our revolutionary approach to accounting for decision making will result in a rethinking of accounting and information system to enable leaders to make more informed decisions.

A.B.C.'s of Behavioral Forensics Sridhar Ramamoorti 2013-09-10 Get practical insights on the psychology of white-collar criminals—and how to outsmart them Understand how the psychologies of fraudsters and their victims interact as well as what makes auditors/investigators/regulators let down their guard. Learn about the psychology of fraud victims, including boards of directors and senior management, and what makes them want to believe fraudsters, and therefore making them particularly vulnerable to deception. Just as IT experts gave us computer forensics, we now have a uniquely qualified team immersed in psychology, sociology, psychiatry as well as accounting and auditing, introducing the emerging field of behavioral forensics to address the phenomenon of fraud. Ever wonder what makes a white-collar criminal tick? Why does she or he do what they do? For the first time ever, see the mind of the fraudster laid bare, including their sometimes twisted rationalizations; think like a crook to catch a crook! The A.B.C.'s of Behavioral Forensics takes you there, with expert advice from a diverse but highly specialized authoring team of professionals (three out of the four are Certified Fraud Examiners): a former accounting firm partner who has a PhD in psychology, a former FBI special agent who has been with investigative practices of two of the Big Four firms, an industrial psychiatrist who has worked closely with the C-level suite of large and small companies, and an accounting professor who has interviewed numerous convicted felons. Along with a fascinating exploration of what makes people fall for the common and not-so-common swindles, the book provides a sweeping characterization of the ecology of fraud using The A.B.C.'s of Behavioral Forensics paradigm: the bad Apple (rogue executive), the bad Bushel (groups that collude and behave like gangs), and the bad Crop (representing organization-wide or even societally-sanctioned cultures that are toxic and corrosive). The book will make you take a longer look when hiring new employees and offers a deeper more complex understanding of what happens in organizations and in their people. The A.B.C. model will also help those inside and outside organizations inoculate against fraud and make you reflect on instilling the core values of your organization among your people and create a culture of excellence and integrity that acts as a prophylactic against fraud. Ultimately, you will discover that, used wisely, behavioral methods trump solely economic incentives. With business fraud on the rise globally, The A.B.C.'s of Behavioral Forensics is the must-have book for investigators, auditors, the C-suite and risk management professionals, the boards of directors, regulators, and HR professionals. Examines the psychology of fraud in a practical way, relating it to aspects of fraud prevention, deterrence, detection, and remediation Helps you understand that trust violation—the essence of fraud—is a betrayal of behavioral assumptions about "trusted" people Explains how good people go bad and how otherwise honest people cross the line Underscores the importance of creating a culture of excellence and integrity that inoculates an organization from fraud risk (i.e., honest behavior pays, while dishonesty is frowned upon) Provides key takeaways on what to look for when hiring new employees and in your current employees, as well as creating and maintaining a culture of control consciousness Includes narrative accounts of interviews with convicted white-collar criminals, as well as interpretive insights and analysis of their rationalizations Furnishes ideas about how to enhance professional skepticism, how to resist fraudsters, how to see through their schemes, how to infuse internal controls with the people/behavioral element, and make them more effective in addressing behav

Being Perfect Anna Quindlen 2009-01-21 A few times in your life, someone will tell you something so right, so deeply true that it changes you forever. That is what Anna Quindlen, author of the timeless bestseller A Short Guide to a Happy Life, does here. In Being Perfect, she shares wisdom that, perhaps without knowing it, you have longed to hear: about "the perfection trap," the price you pay when you become ensnared in it, and the key to setting yourself free. Quindlen believes that when your success looks good to the world but doesn't feel good in your heart, it isn't success at all. She asks you to set aside your friends' advice, what your family and co-workers demand, and what society expects, and look at the choices you make every day. When you ask yourself why you are making them, Quindlen encourages you to give this answer: For me. "Because they are what I want, or wish for. Because they reflect who and what I am. . . . That way lies dancing to the melodies spun out by your own heart." At the core of this beautiful book lies the secret of authentic success, the inspiration to embrace your own uniqueness and live the life that is undeniably your own, rich in fulfillment and meaning.

Accounting Graduates' Competency in Malaysian Public Universities Fauziah Md Taib, Zubir Azhar & Amirul Shah Md Shahbudin 2022-12-29 The market for university and professional accounting education in Malaysia is huge due to the strong demand for qualified accountants and Malaysia's projection of a shortage in the profession. The situation has invited many education providers from around the world to join the bandwagon in trying to get a slice of the pie. How intense is the competition? How does the public universities measure up and survive against all these competition, market strategies and tactics to capture the lucrative business? For the last 20 years, accounting graduates of Malaysian public universities (commonly represented by the middle and lower-income groups) have been subjected to a perception of not being good enough and yet are highly sought after upon graduation. The profession subjected public universities to intense scrutiny by saying the graduates do not measure to being accountants and ironically, majority of the graduates enter the workplace with ease. Such is an irony that calls for a true investigation to satisfy among other questions: How good the public universities accounting graduates really are? Is it true that they are not good enough to be called accountants? Which skill sets are they still lacking? What can be done to improve the situation? The book is a good reading for anyone who shares an interest in accounting education including lecturers, policy makers, regulatory bodies, professional bodies, parents and students. The challenges facing public universities and their encounter against the invisible hand are also discussed.

Deep Beauty Hans Halvorson 2011-04-18 No scientific theory has caused more puzzlement and confusion than quantum theory. Physics is supposed to help us to understand the world, but quantum theory makes it seem a very strange place. This book is about how mathematical innovation can help us gain deeper insight into the structure of the physical world. Chapters by top researchers in the mathematical foundations of physics explore new ideas, especially novel mathematical concepts at the cutting edge of future physics. These creative developments in mathematics may catalyze the advances that enable us to understand our current physical theories, especially quantum theory. The authors bring diverse perspectives, unified only by the attempt to introduce fresh concepts that will open up new vistas in our understanding of future physics.

Rethinking Personal Stewardship Dr. Richard M. White CPA CGMA 2019-09-18 Rethinking Personal Stewardship a systematic approach to assist individuals create a mission-driven development plan for their lives. The plan strategies encompass designing goals and objectives to adequately manage and maintain one's life, time, resources and health through seven biblical principles. It challenges one to rethink these biblical principles of stewardship and how it relates to their lives on a personal day-to-day basis. It calls for the discipline of faithfulness, loyalty, commitment, and obedience to God as His stewards and the blessing that awaits. It is the author's mission to educate and empower God's people on these biblical principles and disciplines so they can be free from financial and life's worries, allowing them to become more involved in taking the Gospel to the world. The book is the cornerstone for reconnecting, reclaiming, and recommitting the people of God to himself as stewards of God.

Competence-based Vocational and Professional Education Martin Mulder 2016-09-08 This book presents a comprehensive overview of extant literature on competence-based vocational and professional education since the introduction of the competence concept in the 1950s. To structure the fi eld, the book distinguishes between three approaches to defi ning competence, based on 1.functional behaviourism, 2. integrated occupationalism, and 3. situated professionalism. It also distinguishes between two ways of operationalizing competence: 1. behaviour-oriented generic, and 2. task-oriented specifi c competence. Lastly, it identifi es three kinds of competencies, related to: 1. specific activities, 2. known jobs, and 3. the unknown future. Competence for the unknown future must receive more attention, as our world is rapidly evolving and there are many 'glocal' challenges which call for innovation and a profound transformation of policies and practices. Th e book presents a range of diff erent approaches to competence-based education, and demonstrates that competencebased education is a worldwide innovation, which is institutionalized in various ways. It presents the major theories and policies, specifi c components of educational systems, such as recognition, accreditation, modelling and assessment, and developments in discipline-oriented and transversal competence domains. Th e book concludes by synthesizing the diff erent perspectives with the intention to contribute to further improving vocational and professional education policy and practice. Joao Santos, Deputy Head of Unit C5, Vocational Training and Adult Education, Directorate General for Employment, Social Aff airs and Inclusion, European Commission: "This comprehensive work on competence-based education led by Martin Mulder, provides an excellent and timely contribution to the current debate on a New Skills Agenda for Europe, and the challenge of bridging the employment and education and training worlds closer together. Th is book will infl uence our work aimed at improving the relevance of vocational education to support initial and continuing vocational education and training policy and practice aimed at strengthening the key competencies for the 21st century." Prof. Dr. Reinhold Weiss, Deputy President and Head of the Research, Federal Institute for Vocational Education and Training (BIBB), Bonn, Germany: "This book illustrates that the idea and concept of competence is not only a buzzword in educational debates but key to innovative pedagogical thinking as well as educational practice." Prof. Dr. Johanna Lasonen, College of Education, University of South Florida, Tampa, USA: "Competence-based Vocational and Professional Education is one of the most important multi-disciplinary book in education and training. Th is path-breaking book off ers a timely, rich and global perspective on the fi eld. Th e book is a good resource for practitioners, policymakers and researchers."

Six Frames Edward de Bono 2008-09-04 Attention is a key part of thinking clearly and productively, and yet we pay very little attention to attention itself. If you see someone lying injured in the middle of the road, for example, your attention would go to that person but, if a bright pink dog wandered past at the same time, your attention would automatically stray to the dog. That is precisely the weakness of attention - it is pulled to the unusual. How much attention do we pay to the usual? So, what can we do about it? Instead of waiting for attention to be pulled towards something unusual, we can set out frameworks for 'directing' our attention in a conscious manner. Just as we can decide to look north, west or even south-east, so we can set up a framework for directing our attention, and that's where Edward de Bono's 'six frames' come in. Each frame is a direction or method in/with which to look, based on a different shape - triangle, circle, heart, square, diamond, slab. Today we are literally surrounded by information and it has never been so easy to obtain. Yet, information itself is not enough; it's how we look at it that really counts. Using the 'six frames' technique is the key to extracting real value from the masses of facts and figures out there and, like all de Bono's techniques, it is simple, effective and will utterly change the way you interpret information.

The SME Business Guide to Fraud Risk Management Robert James Chapman 2022-04-27 All organisations are affected by fraud, but disproportionately so for SMEs given their size and vulnerability. Some small businesses that have failed to manage business fraud effectively have not only suffered financially but also have not survived. This book provides a guide for SMEs to understand the current sources of business fraud risk and the specific risk response actions that can be taken to limit exposure, through the structured discipline of enterprise risk management. The book provides: A single-source reference: a description of all of the common fraud types SMEs are facing in one location. An overview of enterprise risk management: a tool to tackle fraud (as recommended by the Metropolitan Police Service and many other government-sponsored organisations). Illustrations of fraud events: diagrams/figures (where appropriate) of how frauds are carried out. Case studies: case studies of the fraud types described (to bring the subject to life and illustrate fraud events and their perpetrators) enabling readers to be more knowledgeable about the threats. Sources of support and information: a description of the relationship between the government agencies and departments. What to do: 'specific actions' to be implemented as opposed to just recommending the preparation of policies and processes that may just gather dust on a shelf. The book gives SMEs a much better understanding of the risks they face and hence informs any discussion about the services required, what should be addressed first, in what order should remaining requirements be implemented and what will give the best value for money.

Integrative Advisory Services Amy Vetter 2017-10-25 Stop crunching numbers and start truly serving your clients Integrative Advisory Services is the CPA, accounting professional and bookkeeper's guide to the future. As technology paves the way for increased self-reliance and DIY financial services, much of the traditional data entry tasks of accounting professionals and bookkeepers will be reduced. Yet, nothing can replace the human side of the client-advisor experience and the desire to improve your clients' businesses with financial information. Technology will continue marching on, so accounting professionals must adapt to the changing marketplace to thrive in this new paradigm. This book shows you how to provide the kind of value that technology cannot: human connection. Rather than simply reporting data, today's accounting professionals have an opportunity to take a much more active role in their clients' business by analyzing the story behind the numbers, understanding both operations and finance, and guiding the client toward the outcomes they need. Creating an ongoing relationship throughout the year allows you to be proactive rather than reactive, and help your client's business at a holistic level. Your business owner and CEO clients can get the numbers from the computer too—but, they come to you for personalized advice, explanations, and guidance based on their unique situation and financial needs. This book shows you how to take on more of an advisory role and become a critical component of your client's success. Spend less time crunching numbers and more time advising clients Become an integral part of the client's decision-making process Provide real value by clearly communicating financial data analysis Become the strategic partner your client cannot do without Cloud technology, machine learning, and artificial intelligence are not the death knell for financial advisors; in fact, they're the opposite—they do the number crunching for you, leaving you more time to provide the personal guidance that no computer could. As the financial advisory industry evolves, Integrative Advisory Services is your real-world guide to adapting and thriving.
